

BUMAX®

FULLER

Master Distributor

BUMAX® Stocking a large selection of hi-quality standard products for immediate delivery.

**BUMAX® is known as
the strongest
stainless steel bolt
in the world**

Hexagon head bolt and screw
Hex Nut
Hexagon Socket Head Cap Screw
Plain washer
Stud and stud bolt
Thread forming screw
Hexagon socket head countersunk screws
BUMAX® Lock nuts
BUMAX® Hard self-tapping screws
BUMAX® SDX Norsok fasteners

BUMAX® is a specialist in unique designs and custom-made fasteners developed with customers.

Different stainless steel grades are available to provide the optimal fastener solution to meet the needs of your specific application.

Grade	Strength, min TS/YS (MPa)	Steel Standard	Fastener standard	Micro structure
BUMAX 88	800/640	1.4432/36/35	A4	Austenitic
BUMAX 109	1000/900	1.4432/36/35	A4	Austenitic
BUMAX SA	800/640	1.4547, S31254	A8	Austenitic
BUMAX DX 129	1200/1080	1.4462, S32205	D6	Ferrite-Austenitic
BUMAX SDX 109	1000/900	1.4410, S32750	D8	Ferrite-Austenitic
BUMAX SDX NORSOK	750/550	1.4501/1.4410 S32760/S32750	Norsok M630 MDS D60	Ferrite-Austenitic
BUMAX ULTRA	1500/1350			Martensitic
BUMAX HE	1000/900	1.4980, S66286		Austenitic
BUMAX HEP	1000/600	2.4952, N07080		Austenitic

BUMAX® 109

BUMAX® 109 is the strongest A4 fastener on the market. We use the same material as Bumax 88 but achieve higher strength due to a special manufacturing process.

BUMAX® 88

BUMAX 88® is a premium A4 fastener that offers better corrosion resistance than standard A4 due to higher molybdenum content.

BUMAX® SA

BUMAX® SA is a 6Mo high-alloy austenitic stainless steel for seawater and other aggressive chloride bearing medias.

BUMAX® DX 129

BUMAX® DX 129 is a duplex stainless steel product with very high strength combined with excellent corrosion resistance.

BUMAX® HEP

BUMAX® HEP is a high temperature resistant material with excellent oxidation resistance and high tensile and creep properties at temperatures up to 815°C.

BUMAX® SDX 109

BUMAX® SDX 109 is a super duplex grade with excellent mechanical properties, and exceptional resistance to general crevice, pitting and stress corrosion in aggressive environments.

BUMAX® ULTRA

BUMAX® Ultra, a unique precipitation hardenable stainless steel that can be delivered in ultra-high strength levels.

BUMAX® HE

BUMAX® HE is a high temperature resistant material for applications requiring high strength and good oxidation resistance at temperatures up to 700°C.

BUMAX® SDX NORSOK

BUMAX® SDX Norsok fasteners are accredited to NORSOK certification and can be provided in super duplex grades.
